About Us

Since its inception in 2006, AL MATAFI has become the synonym to high quality Pest control services throughout the Middle East.

Al Matafi proudly covers the whole spectrum of the pest control services industry: ranging from Pest Management, Termite Proofing & Control, Bird Control. All these services are catered with care to residential, commercial, and industrial sectors.

With a highly qualified array of staff including technicians, engineers, field experts all these teams are supported by the latest of technologies, equipment, and scientific programs to ensure our quality services.

This complete and tightly knit structure ensures high quality of wide range services conforming with the American and British standards adopted to the Middle East region environmental knit.

Since our priority concern is the public health and safety of the environment, all our pesticides are odorless, stainless, low toxic and are approved by the World Health Organization (WHO), Local Municipalities and other Authorities.

With its professional trained personnel, we will always seek to provide our services in the timeliest manner and with an on-going comprehensive quality-control program to provide highest possible level of customer satisfaction.

Why Al Matafi

SOUND OPERATIONAL EXPERTISE

Al Matafi focused on leveraging the synergy between the knowledge of our highly qualified personnel, which include technicians, engineers, field experts and entomologists, and the latest technologies, equipment, and scientific programs to deliver the highest quality of services to customers all over the Middle East. Over the years, we have tackled projects of all sizes, ranging from private residential, commercial, industrial, to public governmental institutions.

MINIMIZED PESTICIDE USAGE

By use of mechanical, physical, and biological controls, we can achieve our goals without the reliance on routine pesticide treatments, thus minimizing the exposure levels to harmful pesticides and environmental impact.

ENVIRONMENTAL FRIENDLY

The fact that we work in pest extermination, does not mean we are careless about the environment and the importance of wildlife and the effects of imbalance in nature. We strive to implement humane and environmentally responsible measures to curb potentially harmful effects from pests without disturbing the ecological balance.

COMMITMENT TO EMPLOYEE TRAINING & DEVELOPMENT

AL MATAFI focuses on carefully recruiting talent from all over the world and provide them with training to ensure that the communication skills, service knowledge and grooming standards exceed our customer's expectation. Al Matafi exceeds expectations and goes beyond borders to ensure that our clients are not only looked after 24/7 but are satisfied with the outcome and professionalism of our employees, systems and services.

Industry Expertise

For over 20 years, Al Matafi Pest Control has been providing unmatched services to thousands of its esteemed customers in the Middle East, that function in a wide range of industries and business sectors.

Some of the sectors we have provided our services to include:

Packaging Facilities
Manufacturing units
Stores & Warehouses
Food Processing units
Schools & Universities
Offices & Business centers
Hotels & Restaurants
Hospitals & Clinics
Staff Accommodation
Malls & Shopping Centers
Facilities Management
Farming & Agriculture
Museums & Antiquities
Pharmaceutical Companies
Catering Companies
Ships & Vessels

Application Methods

GEL BAITING

(specifically for cockroaches) an advanced formulation of gel will be applied in small quantities to infested areas. The gel contains an attractant to lure the cockroaches and the active ingredient quickly kills them when they feed on it. Cockroaches are cannibalistic hence others are killed when they subsequently feed on those who have ingested the gel. This is a very safe product and can be used in food preparation/ high risk areas.

SPRAYING

Spraying to be conducted and limited only to areas where there is positive pest activity. Spot treatments will not be conducted near food preparation areas unless permitted by the pesticide product label. Insecticidal sprays are often useful to “flush” cockroaches out of cracks and crevices then the gel bait takes over in terms of dispatching them

SPOT TREATMENTS

spraying to be conducted and limited only areas where there is positive pest activity. Spot treatments will not be made near food preparation areas unless permitted by the pesticide product label.

MISTING TREATMENT (INDOORS)

a pest control treatment designed to spray pesticides as a fine mist in a confined area to kill heavy infestations of flies and mosquitoes.

LARVICIDE

will be undertaken on stagnant water for mosquitoes. This method kills the larvae or young stage of the mosquitoes. It is still preferable/more effective to remove the water source but sometimes this is not practical or possible

RATPROOF

A system that provides total proofing of the premises against the invasion of rodents like Rats and Mice by baiting and multi-trapping that is safe to humans and pets.

Pesticides & Equipments

All products and equipment used in our scope of work are advanced and renowned in the world. Pesticides used for our services are of low toxicity and odorless characteristics.

They are registered internationally from respective countries of origins and at the same time registered and approved locally with the Government bodies.

Quality Policy

We have established a Quality Management System to achieve the following:

To ensure that our services and Quality Management System are continually reviewed for suitability and diversified as necessary.

To ensure implementation of systems and procedures to facilitate continual improvement in the services that we offer.

To comply with relevant statutory and regulatory requirements including compliance with relevant standards and health & safety of our employees, clients, and the public.

To ensure that our company is customer focused and responds to the needs and expectations of our customers within the agreed service levels.

To ensure that all employees observe and implement the mandatory work methods and procedures identified in the Quality Management System or others to which reference is made.

The quality policy principles and related objectives will be always communicated and available to staff. Training will be an integral part of the strategy to achieve quality objectives.

To be innovative and creative by being aware of new developments in technologies and treatment methodology to ensure our customers receive the best pest control service.

Our Statements

IPM

INTEGRATED PEST MANAGEMENT

Health of mankind and the environment has been the world's focus over the last decades. Several criteria affect our health today, mainly contamination in all its phases and it is a well-known fact that pests are major transmitters of diseases, and they cause damage to health, property and environment through water and food contamination.

Our professional engineers will carry out an initial FREE of charge, in-depth inspection of the customer's property to assess the risk level from infestation and to ensure that a customized strategy is created based on the parameters procured from the survey of the site.

A comprehensive service program and schedule is specifically customized that keeps your premise free from unhealthy pests around the clock and to protect it from all sorts of food contamination, poisoning and or materials and property damage.

A detailed, scientific and technical inspection report is submitted along with our proposal evaluating the pre-status of the premises and suggested scope of work custom tailored through Al Matafi service systems.

Implementation of an ultra-safe and scientific treatment, adapted to the Middle East region, through our service systems geared by our qualified service technicians and engineers

Elite customer service officers are ready to promptly attend to our customer's requirements, respond to their queries, advise the ultimate solutions, and arrange the appropriate recommendations.

Termite Control

PROOFING & CONTROL

Al Matafi emerged as the first in its field to introduce an application system to control termites, applying its own unique program for exterminating those tiny, underestimated insects that can eat you out of your house and business. Without even showing their ugly face to the world, termites can be diligently at work inside a timber or stud, eating away at its structural strength. Only by careful inspection of your property by trained professionals can damage of this sort be uncovered. And early detection is the best way to prevent extensive termite damage.

Pre-Construction Termite Proofing

Newly constructed buildings should have comprehensive Pre-Construction Termite Proofing to secure them from termite attacks. An aqueous solution of termiticide is applied at a specific rate on the base of the construction, using appropriate methods based on the structure and surface parameters of the construction.

Post-Construction Termite Control

Termite attacks are possible if the building has wooden structural members that touch the ground or sealed basements or areas that are inaccessible or even if the geographical conditions of the site permits. Post-Construction Termite Control is the most effective control methods possible under such conditions.

Termipost

A special combination of fumigant, injection and surface spray on antiquities and decorative objects against dry wood termites, decaying insects and wood boring insects.

Termibait

A termite baiting system aimed at eliminating subterranean termite colonies in a safe and non-invasive way.
